

Population layer: GNP vs medulloblastoma transient-G0 -- Overton graded split + Spencer sister concordance

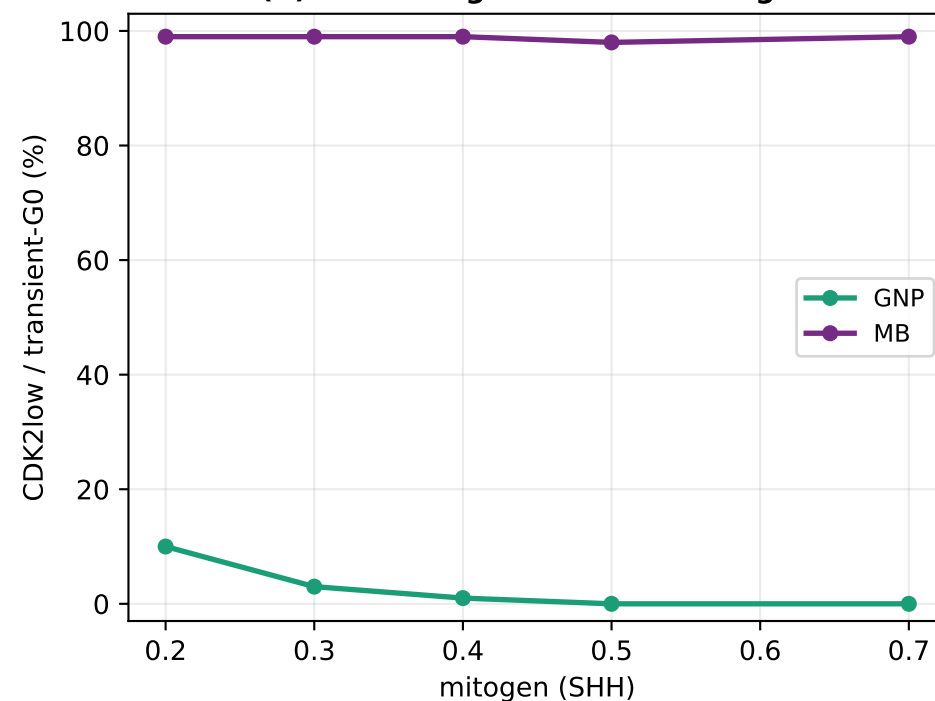

N=100 lineages/type, data-grounded abundance draws (CyclinD1 CV 0.70, birth-p27 CV 0.33, EZH2 CV 0.55) + partition-noise redraw; MB uses the fold-safe MB-specific birth-p27.

(A) Fate composition (SHH=0.5)

MB is transient-G0-rich

(B) Overton: graded G0 vs mitogen

(C) Spencer sister concordance
