context inputs (p16, p21 = CDK-inhibitor tone)

drug switches

p16: competitive CDK4/6 brake (raises K_CdRb) · p21: CDK2 inhibitor (kSyP21, xbaseline) · serum-starve k_Cd_trans→0 · CDK4/6i kPhRbCd→0

B Parameter space: CyclinD1 vs the CDK-inhibitor brake
