Within-cycle anatomy (GNP, default CyclinD1): the transient G0 is the p27-high / phospho-Rb-low window after division
transient G0
CyclinD1 protein (Cd)
cell mass
M_commit (size gate)
phospho-Rb (pRb)
p27 (=P21)
Skp2
pRb commit thr (0.5 max)
p27-low thr
aRc (active forks, S)
Dna (0->1)
MPF (mitosis)
a.u.
time since a division (h)
