MB cells that divide, then arrest — when a cell's CDK-inhibitor level (orange) drifts up, it stops dividing (G0)
19 divisions, then stops 480 h (stays arrested)
G0 arrest
28 divisions, then stops 68 h (re-enters)
G0 arrest
13 divisions, then stops 66 h (re-enters)
G0 arrest
26 divisions, then stops 60 h (re-enters)
G0 arrest
11 divisions, then stops 58 h (re-enters)
G0 arrest
16 divisions, then stops 58 h (re-enters)
G0 arrest
