CDK-inhibitor protein (p18+p19+p27, a.u.)
(C) The simulated MB cells that fall into G0 dwell between divisions
CyclinB–CDK1 (each spike = a division)
CDK-inhibitor 7× mean — G0 dwell, ~77 h cycle
CDK-inhibitor 5× mean — G0 dwell, ~60 h cycle
CDK-inhibitor 3× mean — G0 dwell, ~42 h cycle
