

Distribution model (N=400) — fractional EZH2i rescue of vismo-arrested MB; three measured-variation axes (CyclinD1 CV 0.70, p27 0.33, EZH2 ~0.55)

**(A) CyclinD1 distribution:
model vs measured (CV check)**

**(B) Who gets rescued?
CyclinD1 × EZH2 abundance (measured variation)**

**(C) Outcomes (N=400)
rescued = 60% of arrested**
